

As a Hospice Homecare nurse, I am in my car all day and I am constantly listening to KLOVE on 106.7. It would truly be a disservice to everyone if this station was displaced by an LPFM broadcaster providing other programming. It is important to have this type of programming for families to access. Everyone deserves the right to listen to Contemporary Christian music and have access to a station that provides family friendly programming. This is a wholesome station that is a great witness across America.
